Address: Ha Noi, Viet Nam

OBJECTIVE

As a second-year Software Engineering student at FPT University, I am currently seeking a **Backend Developer Internship**. My core technical competencies include **Java** and **TypeScript**, alongside proficiency in database management systems such as **SQL Server** and **MongoDB**. Additionally, I am well-prepared to contribute as a **Fullstack Developer**, leveraging my project experience with **React.js** and **Next.js**.

EDUCATION

Sep 2024 - Dec 2027

FPT University

Computer Software Engineering

Current GPA: 3.3/4

PROJECTS

Jan 2026 - April 2026

Prolite

Backend Developer, AI Team

A social networking web application featuring posts, stories, and real-time messaging, integrated with AI-driven text enhancement to ensure civilized and constructive user interactions.

- Designed schemas and built the Supabase database.
- Built CRUD method and building an AI-integrated matchmaking web app using Hono and TypeScript
- Collaborated with the Frontend team to build a responsive UI using React
- Technologies: Node.js, TypeScript, Supabase, Socket.io
- Website: Under Active Development
- Github: https://github.com/httt526/Team-7-JS-Prime-Seven.git

Jan 2026 - April 2026

OctatechShop

Backend Developer

Developed a computer marketplace featuring dynamic filtering by brand, price, and technical specifications, streamlining the product discovery process for laptops and accessories.

- Designed schemas and built the SQL Server database.
- Integrated Spring Security for user protection and utilized SQL to develop a real-time business reporting dashboard.
- Technologies : Java(Servlet/JSP, Spring Boot), MVC Architecture, SQL Server, Maven
- Website: Under Active Development
- Github: https://github.com/Haipm26/PRJ301_Team8.git

ACTIVITIES

Jan 2026 - Present

FPTU JS Club - Japanese Software Engineers

Technical Department Collaborator JS Club

The Japanese Software Engineers Club is a gathering place for those who are passionate about Japanese and programming at FPT University.

- Develop some software applications: Prolite, OctatechShop

- Contributed to building a vibrant club culture by organizing academic workshops and team-bonding activities to foster member growth.

Jan 2026 - Present

Information Security Laboratory - FPT University

Student Researcher, Software Developer

Researched and developed secure examination applications and educational tools to enhance the university's testing infrastructure.

- Developing examination software for students.
- Researched AI integration, campus network security, and anti-hacking solutions for examination software.

CERTIFICATIONS

Jan 2026	Software Engineering Specialization
June 2025	Web Design for Everybody: Basics of Web Development & Coding Specialization
Dec 2024	IELTS Academic – Overall: 6.0

SKILLS

Backend	Node.js, Java, TypeScript
Frontend	HTML, CSS, JavaScript, React.js
Database	MongoDB, SQL Server, Supabase
Tools	Git, Github
Language	English (C1), Japanese (Elementary)

INTERESTS

Passionate about continuous learning, cultural exploration through traveling, and enhancing strategic thinking through Badminton and Esports.
